Maxsea 12.6.4.1 with CM93 v.3 Issue 505 Professional.rar Is President-elect Donald Trump planning to repeal the Dodd-Frank Wall Street Reform Act? The Wall Street Journal reported on Monday that one of Donald Trump's first actions as president will be to repeal that law. The Obama administration has already taken steps to implement parts of the law, but those changes are expected to be rolled back under a Republican administration. "The new administration will continue to look for ways to make the financial system safer and more resilient in the wake of recent issues such as the financial crisis and the 2008 collapse of the U.S. mortgage market," according to the Journal, which cited anonymous sources. "Executives of banks and other financial firms told people familiar with the discussions that Donald J. Trump's administration is preparing to roll back some of the most controversial regulations enacted in the wake of the 2007-2009 financial crisis." The Journal's reporting matches up with an email sent to clients in February that cited the president-elect's stance on Dodd-Frank. According to the email from Bank of America's Doug Braunstein: The new administration is planning a number of firsts for America's economy: In addition to repealing the Dodd-Frank law, the new administration intends to create new and more flexible capital and liquidity regulations for banks and financial services firms, in addition to lower taxes and increase regulatory certainty; and, it intends to aggressively move our housing market back to equilibrium. In short: Dodd-Frank is history. Will it happen? It's not clear yet when or how Dodd-Frank will be gone. But a few things have changed since then. Banks have already been rolling back regulations. The Treasury Department recently relaxed the provision in the law that requires banks to hold emergency funding in separate accounts to prevent runs on banks. The Treasury Department 6d1f23a050
